## English
Mother tongue

## Bulgarian
Fluent

I am currently living in London(UK).

## About me

I am a full Microsoft stack developer passionate about technology, coding, software design, development methodologies and entrepreneurship. I have start-up experience, working as technical resource to build and scale Execview - an enterprise SaaS product, as well as actively helping shape the development life cycle from an ad-hoc approach to agile. I am product centric and a strong supporter of metrics to understand what works and what doesn't from a software and a product perspective.

## Experience

### Technical Team Lead
Execview

May 2014, present

- Development
- Design
